

2009 IPM Training (IPM) and New Grower Program (NGP)

Final Program – Jones Winery on April 4, 2009

The IPM training program will **start at 9 am**. The IPM training this year will focus on organic methods of disease control by Richard Kiyomoto for one 1.5 pesticide credits.

The New Grower Program (**start at 10:30 am**) is open to everybody interested in attending and will involve a history of the winery/vineyard, pest control and horticultural practices, and a vineyard and winery tour. Pesticide credits will also be awarded for the New Grower program – 1.5 credits for a total of 3 for the day. The Jones Winery is the final winery on this year's program and represents the only one that has been open for more than a year.

If you attended the sessions at Walker Road and at Paradise Hills and come to the program at Jones Winery please check in with me to collect your pesticide credit forms for those sessions. I would appreciate an RSVP if you anticipate attending the Jones Winery program (richard.kiyomoto@uconn.edu). The RSVP not mandatory, but helps greatly. Jones Winery was intentionally scheduled at the end of this series and I encourage everybody to make an effort to attend as there will be a tour of all the facility and a pruning discussion/demonstration.

April 4, 2009 (IPM & NGP)
