

Integrated Pest Management for Herbaceous Perennials

NEW 2003!
42-Pages, 85 Color photos

\$15

includes shipping and handling

Written by
Leanne Pundt, University of Connecticut
Tina Smith, University of Massachusetts,
Extension Floriculture Program

Forty two pages with 85-color photos featuring pest management practices, key insects and their life cycles, diseases, weed control, monitoring techniques and cultural requirements plus 6-tables containing scouting guidelines, biological control options and selected insecticides, fungicides and herbicides registered for use on herbaceous perennials grown in New England. Financial support was provided by a grant from New England Floriculture Inc., sponsors of the New England Greenhouse Conference.
